High Angle

Technical Rescue – Level II

Course Overview

- Rope skills & basic knots
- Belaying & back-up systems
- Tag lines
- Descent control devices
- Deflection lines
- Victim packaging techniques for raising or lowering
- Rescuer retrieval systems

Course Code: 6613 | Duration: 16 Hours

Course Description

This program will build upon the knowledge foundation obtained in the Rescue Essentials program. This hands-on program will provide students with exposure to a greater range of rescue equipment and techniques in order to address a wider variety of potential scenarios.

The course curriculum consists of practical learning, and students will be provided ample opportunity to develop their skills in a controlled, practical environment.

Small classroom groups will ensure maximum participation and involvement for all students, with highly qualified instructors to guide the group.

Course prerequisite: 6603 High Angle Technical Rescue - Level I
