

3M

Fall Protection – Certified Instructor Equipment Inspection

Course Code: 7222 | Duration: 2 Days

Course Overview

- Instructor certification card & wall certificate
- Training bag including basic classroom supplies
- Instructor resource booklet
- Detailed instructor lesson plans & course outline
- Course delivery checklists
- Electronic presentation
- Initial supply of serialized student activation kits
- Ongoing program updates & support

Course Description

This intensive program will allow prospective instructors to gain an in-depth understanding of fall protection equipment inspection and prepare to teach our 4-hour Fall Protection Equipment Inspection course. Qualified candidates, who possess knowledge of fall protection, teaching and classroom management skills, will enjoy this fast-paced program where the course material is broken down by the lead instructor. Instructor candidates will have opportunities to ask questions and learn this course's structured material. The second day will include a written test and topic teaching evaluation.

Successful candidates will be awarded with a Fall Protection Group Certified Instructor designation for this course. They will have the knowledge and tools to deliver our Fall Protection Equipment Inspection course to other individuals. Tools include an electronic presentation, serialized student activations and detailed instructor materials to assist with all aspects of instructing the program. Fall Protection Group maintains the program and will provide valid instructors with ongoing access to updated materials and information.

Course includes: 6222 Fall Protection Equipment Inspection
